

Project Demo Planning

Date	08 October 2026
Team ID	SWTID-2026-2386
Project Name	EduGenie: Google Gemini Powered Learning Assistant
Maximum Marks	1 Mark

Project Demo Planning

S.No	Demo Section	Description	Duration (mins)	Responsible Member
1	Introduction & problem statement	Why students need simple explanations, summaries and practice; project goal	1	Keerthana S
2	Architecture & tech stack	FastAPI + Gemini diagram; one module per feature; model fallback	2	Sarumathi S
3	Setup and Gemini key	<code>.env</code> , <code>check_gemini.py</code> , why the key never reaches the browser	1	Dhanam V
4	Question, follow-up, explanation (live)	Ask "What is a Turing machine?", then a follow-up; explain process synchronization	2	Samyuktha B
5	Summary and quiz (live)	Summarize pasted notes; quiz on the Pythagoras theorem, choose a wrong answer	2	Risah Ruth R
6	Learning path, errors and testing	SQL learning path; empty input message; run <code>pytest</code>	2	Keerthana S
7	Scalability, future plan, Q&A	Roadmap and answers	2	Whole team

Demo Flow Summary

Step	Activity	Notes
1	Introduction & Problem Statement	Use PS-1 to PS-4 from Phase 1
2	Solution Overview	Show the architecture diagram and the one-file-per-feature layout
3	Live Feature Demonstration	Question, follow-up, explanation, summary, quiz (pick a wrong answer), learning path, empty-input message
4	Q&A Session	Be ready to explain the model fallback, quiz JSON validation and where the API key is kept

Pre-demo checklist

- `.env` has a working `GEMINI_API_KEY`; run `python check_gemini.py` the day before.
- Server started with `uvicorn main:app`; page opened at `http://localhost:8000`.
- Prepare a paragraph of notes to paste into Summarize.
- Run `pytest tests` once and keep the result ready to show.
- If Wi-Fi fails, the app cannot reach Gemini and shows a friendly message; explain this as the expected behaviour.
